I am currently in 6th semester of CSIT at ASCOL. I worked as a front-end developer for three months in the preceding few years, using HTML, CSS, and JS. I'm currently working on numerous React-related projects and learning about it. I'm familiar with HTML, CSS, JS, TS, Tailwind CSS, Bootstrap, Sass, React JS, Redux Toolkit, Next JS Git, Vercel, Netlify. I'm seeking for a React Developer internship.

EXPERIENCE

Spyders Lab Pvt. Ltd   Sorakhutte, Kathmandu

Frontend Developer with HTML, CSS, and JS   Sep, 2022 - Dec, 2022

As a frontend developer, I began my learning journey with this organization, where I completed several projects utilizing HTML, CSS, and JavaScript.

Open Source Ascol Circle (OSAC)   Feb, 2022 - Aug, 2023

Executive Member

With this club, I've learnt a lot more about how to interact with audiences and students. I've dedicated my time to educating juinors, contributed to resource management as a program coordinator.

Leo Club of Kathmandu Nepalaya   Aug, 2023 - Present

General Member

I'm joining this club to get leadership skills and practical experience in social situations. I have volunteered my time to present meetings, events, and other activities.

EDUCATION

Bsc. CSIT
                                                                                                                      Lainchaur, Kathmandu
Amrit Science Campus (ASCOL)   Apr, 2021 - Present

+2 Science
                                                                                                                      Lainchaur, Kathmandu
National School of Sciences (NIST)   Feb, 2019 - Mar, 2021

PROJECTS

Tic-Tac-Toe (React)

https://tictactoe-suyog.netlify.app/

In this small-scale project, I've used basic React. Hooks allowed me to add some logic to my code. I have included some exciting UI/UX design for players.

Todo List (React)

https://suyog-todo-list.vercel.app/

This task is a to-do list where we may add our to-do, ongoing, and completed activities and choose the corresponding tech task. We can enumerate other tasks that we've finished.

KFC (HTML/CSS/JS)

https://kfcmain.netlify.app/

This is a static page that presents a food-related web page using HTML, CSS, and JavaScript. It includes a dark mode and is quite responsive. I recently demonstrated my expertise of this project as a beginner.

ACHIEVEMENTS

AICRUSADE 2023

In Pachkhal, Dhulikhel, I take part in an event hosted by KU with my friends. It is here that I gained knowledge and expertise in managing a team. Frontend Developer was my role.

Volunteering at CSIT career connect

Here, I assist juniors who are interested in the IT profession as a volunteer for the CSIT association. I gave the group a lot of service and assistance. I gained some experience running a mass as a volunteer.

TRAINING/CERTIFICATIONS

MERN stack development   2024

Dursikshya Education Network Pvt. Ltd

I've gained a basic understanding of how the backend works. I learn how to use MongoDB to manage databases and Express to make it easier to create server-side code in Node.js by providing routing, middleware support, and other tools. React to SPA design, routing, hooks, and more. Using Node.JS to execute JavaScript code on the server-side.

Ultimate React Course: React, Next.js, Redux and others   2024

Udeny

I have developed a comprehensive understanding of React, focusing on building dynamic and interactive user interfaces. My expertise includes core concepts such as components, JSX syntax, props, events, forms, and state management, with a clear distinction between props and state. I am proficient in best practices for state placement, lifting state up, and managing local versus global state, as well as differentiating UI state from remote state. I excel in designing reusable and maintainable components, effectively using props as an API for component communication, and employing the children prop for flexibility. Additionally, I am proficient in Next.js, working with the "app" router, React Server Components, Server Actions, server-side rendering, static and dynamic rendering, data loading strategies, streaming, caching, image and font optimization, and authentication with NextAuth.

React Basis   2023

Coursera

Through this course, I have begun to learn about web applications and am familiar with basic React hooks, components, props and soon.

SKILLS

- HTML, CSS
- JS/ TS
- Bootstrap/ Tailwind CSS/ SASS
- React JS, Redux Toolkit
- Next JS
- C / C++
- Git, Github
- Vercel / Netlify
